	Chinese	公司金融学			
Course credits hours	Total	Theory	Self-study or Practice	Credits	
	60	50	10	4.0	
Course description: Describe the aims of the course					
<p>This course will explore the theory and practice of corporate finance. Material covered will focus on areas of relevance to corporate managers as financial decision-makers. Corporate financial decisions include how to raise capital (for example through security issues, bank borrowings, selling assets, et cetera), and what to do with it once it has been raised (for example investment in projects, payment of dividends, repurchasing securities). Special emphasis will be placed upon the understanding of the role of the financial manager, the goals of the firm, and the agency relationship between the managers and shareholders in the context of these goals.</p>					
Requirements for courses; ability and knowledge in advance					
Economics, finance, investment, accounting principle
